Hello!
My name is Faisal!
It's my Curriculum Vitae

I am a fresh graduate of S1 Computer Science Education, University of Education Indonesia. I really like art, cartoons and design, so I have become a Animator 2D and UI/UX Designer with excellent motivations to learned something new alongside with the movement of industry needed. Fast to learn and easy to adapt with new environment. Excellent coordination and communication skills. When I was in education I used to make UI / UX Design and create 2D animation, in carrying out these tasks, I always put creativity first.

I really like challenges and competitions. One of the greatest achievements that I have achieved so that the name of the Indonesian education university is successful in making designs and animations with a high enough level of complexity and **winning 1st place in the national level animation category at the Selisik IT and Animation Competition 2018** at the Bandung Institute of Technology.
